PROFILE

Even though I was born in Germany/Berlin in 2002, I spent my entire childhood and youth in Turkey. I continue to receive my education in Türkiye/Gaziantep. As a software engineering student, I aim to improve myself in the field of Machine Learning, Deep Learning Algorithms and Artificial Intelligence. I continue my studies with the aim of becoming a Data Scientist and I plan my career accordingly.

EDUCATION

Bachelor

Hasan Kalyoncu University

2020 – present
Gaziantep, Turkey

I am studying at Hasan Kalyoncu University in the department of Software Engineering at Bachelor degree. I have been active in various engineering clubs as long as I have been studying, and I spend a student life in which I always try to improve myself and the people around me and try to take their careers one step further.

EMPLOYMENT

T3 Instructor Mentor

Instructor

03/2023 – 03/2024
Gaziantep

I was in the role of teaching students at Deneyap Technology Workshops and mentoring the teams supported for competitions, creating a nurturing cycle between students.

Google Developer Student Club

Social Media Manager

06/2022 – 05/2023
Gaziantep

I was the social media team manager of the Google Developer Student Club. I manage Instagram, Twitter and LinkedIn accounts of Google Developer Student Club

Work and Travel

Ride Operator

2022 – 09/2022
Charlotte,
North Carolina

I was responsible for making sure that people using attractions, theme parks, and fairground rides were safe and secure at all times.

Huawei Student Developer Campus Ambassador

Campus Ambassador

10/2023 – present
Gaziantep

It is my responsibility to plan and execute campus events to raise awareness about the technology solutions offered by Huawei. I lead the organization of workshops to provide students with technical skills and share up-to-date information about the Huawei ecosystem. By collaborating on relevant activities, I guide students to make valuable connections and shape their careers.

- Huawei R&D Meeting
- AI'NTEP Artificial Intelligence Festival
- Teknofest Winners Organization
- GameJam Organizations

LANGUAGES

Turkish

English

PROJECTS

Unmanned aerial vehicles (UAVs)

09/2022 – 01/2023

I participated in the Teknofest Unmanned Aerial Vehicle rotary wing category.

IntelliHome Smart home technology systems have been developed using Arduino and necessary sensors	10/2023 – 02/2024
Alice - Personal Voice Assistant I developed my own voice assistant using Python and various libraries. With this voice assistant, which I named Alice, you can have short conversations, learn the presidents of countries, their capitals, some mathematical operations, current and instant market values of leading companies such as Tesla, Google, Amazon etc. and provide English-Turkish translation.	12/2023 – 12/2023
Fitify Developed with React Native, Fitify is a Fitness App where users can enter their goals and easily track whether they have reached their goals or not.	04/2024 – 05/2024
Echoes of Sign Language Using image processing technology, the technology aims to eliminate the communication problem of individuals with speech impairment in places that require presentation in daily life. This project is also a finalist project in the 2024 Adana Teknofest.	01/2024 – present

INTERESTS

Playing Basketball and Football — I have been involved in sports since I was a child. During my primary and secondary school life, I played in Football academies and Clubs. In High School and University, I started playing Basketball and played in school teams and basketball teams of my city. | **Music** — The first instrument I was introduced to music was the piano. I studied piano for months at a young age, then I studied guitar in high school and played guitar for a certain period of time. During my high school years, I was involved in rap music and released a few singles. In my university years, I studied drumming, but I could not advance. | **Chess** — I like to play chess in my free time. I think it is good for me. Playing chess helps me to develop new strategies and to think from different perspectives.
